23 NOV 1906

PRICE AND EXCHANGE LIST OF PHILIPPINE BIRDS IN THE COLLECTION OF THE BUREAU OF GOVERNMENT LABORATORIES.

INTRODUCTORY NOTE.

The collectors of natural-history specimens for the Philippine Insular Government were originally placed, for administrative purposes, under the Bureau of Non-Christian Tribes, which had temporary charge of the gathering of museum material. Subsequently these collectors, together with the material which they had gathered, were transferred to the Bureau of Government Laboratories.

An exchange list of birds was issued by the Bureau of Non-Christian Tribes in January, 1903. The bird collection has now been so materially increased that it seems desirable to issue a new exchange list.

The exchange list previously sent out elicited numerous inquiries as to the prices at which bird skins would be sold for cash. The Philippine Government prefers to exchange bird skins rather than to sell them, and it especially desires to secure, by exchange, bird skins from the several islands adjacent to the Philippines and from the neighboring Asiatic mainland, preference being given to species which occur both in these regions and in the Philippines or to species which do not occur in the Philippine Islands but belong to genera which are here represented. In view, however, of the demand for skins of Philippine birds on the part of institutions and of persons who have no suitable material to offer in exchange, skins will be sold for cash at the prices quoted in the following list. In all cases in which no price is quoted it will be understood that the species enumerated are represented in the Government collection but that the number of specimens is at present so limited that they are not offered for sale or exchange.

Persons who desire skins of species not included in this list are requested to communicate with the Superintendent of Government

Laboratories, in order that advantage may be taken of the first opportunity which presents itself to collect the material desired.

The prices quoted are in United States currency and are strictly net. Payment may be made either in United States currency or in Philippine currency at the ratio of two pesos, Philippine currency, for one dollar, United States currency.

No additional charge will be made for postage or packing where orders are small and specimens can be forwarded by mail; but in case it is necessary to forward them by express or freight, transportation charges must be paid by the person making the order.

All communications should be addressed to the Superintendent of Government Laboratories.

MEGAPODIIDÆ.
